

Strategic Management in the Age of Artificial Intelligence — MGMT 465/665

Summer 2026

Course Information

Course Number	MGMT 465 / MGMT 665
Course Title	Strategic Management in the Age of Artificial Intelligence
Credit Hours	3
Term	Summer 2026
Meeting Days/Times	Monday and Thursday, 1:20–3:25 P.M.
Location	AB 3336
Delivery Format	In-Person
Prerequisites	Introductory course in strategic management or equivalent knowledge of organizational behavior, management, marketing, finance, or economics. No programming experience required.

Instructor Information

Instructor	Omar R. Malik, Ph.D.
Office	AB 4304C
Email	omalik@kettering.edu
Phone	(616) 808-9866
Office Hours	Mon/Thu 12:20–1:15 P.M.
Preferred Communication Method	Email

Course Description

Strategic Management in the Age of Artificial Intelligence examines how artificial intelligence is transforming competitive strategy, organizational capabilities, executive decision making, innovation, and enterprise performance. The course integrates classical strategic management theories—including industry analysis, the Resource-Based View, Dynamic Capabilities, Organizational Learning, Transaction Cost Economics, and

Strategic Leadership—with contemporary scholarship on artificial intelligence, digital transformation, platform ecosystems, and human–AI collaboration.

Students critically evaluate how AI influences the assumptions underlying strategic management while developing practical competencies through case analyses, AI laboratories, executive briefings, and a semester-long consulting engagement. Emphasis is placed on evidence-based decision making, responsible AI governance, organizational transformation, and strategic leadership in increasingly AI-enabled organizations.

For full course philosophy and rationale, see [Part 0 — Course Philosophy](#) and [Part I — Course Foundations](#).

For detailed course design and learning objectives, see [Part II — Course Design](#).

Course Learning Outcomes (CLOs)

Upon successful completion of this course, students will be able to:

CLO	Learning Outcome	Bloom's Level
CLO 1	Analyze competitive environments using classical and AI-enabled strategic frameworks.	Analyze
CLO 2	Evaluate organizational capabilities and AI readiness.	Evaluate
CLO 3	Formulate AI-enabled competitive strategies.	Create
CLO 4	Assess governance, ethical, legal, and societal implications of AI.	Evaluate
CLO 5	Integrate multiple strategic theories into comprehensive organizational analyses.	Create
CLO 6	Employ AI responsibly to support strategic decision making.	Evaluate
CLO 7	Communicate executive-quality strategic recommendations.	Create
CLO 8	Design organizational transformation strategies for AI adoption.	Create
CLO 9	Critically evaluate the continuing relevance of strategic management theory.	Evaluate
CLO 10	Integrate strategy, leadership, technology, and organizational capabilities into a coherent executive perspective.	Create

Program Learning Outcomes (PLO) Alignment

Program Learning Outcome	Course Learning Outcome(s)
Strategic Thinking and Analysis	CLO 1, CLO 2, CLO 5, CLO 9
Evidence-Based Decision Making	CLO 3, CLO 4, CLO 6
Professional and Executive Communication	CLO 7
Responsible Leadership	CLO 4, CLO 6
Organizational and Technology Integration	CLO 8, CLO 10

Assurance of Learning (AoL)

Learning Goal	Assessment Method	Assignment/Artifact
Strategic Analysis	Case Analysis Rubric	HBS Case Analyses
Theoretical Integration	Written Assignment Rubric	Theory Evolution Exercises
Evidence-Based Decision Making	Consulting Report Rubric	AI Strategy Consulting Project
Executive Communication	Presentation Rubric	Executive Board Presentation
Responsible AI Use	AI Disclosure + Rubric	Lab Portfolio & Consulting Report

Required Materials

Textbooks

Iansiti, M., & Lakhani, K. R. (2020). *Competing in the age of AI: Strategy and leadership when algorithms and networks run the world*. Harvard Business Review Press.

Agrawal, A., Gans, J., & Goldfarb, A. (2018). *Prediction machines: The simple economics of artificial intelligence*. Harvard Business Review Press.

Agrawal, A., Gans, J., & Goldfarb, A. (2022). *Power and prediction: The disruptive economics of artificial intelligence*. Harvard Business Review Press.

Lafley, A. G., & Martin, R. L. (2013). *Playing to win: How strategy really works*. Harvard Business Review Press.

Required Readings

Weekly readings pair foundational strategic management scholarship with contemporary AI research. See [Part X — Learning Resources and Curated Knowledge Base](#) for the full annotated reading list.

Foundational Canon includes: Porter (1996), Barney (1991), Teece, Pisano & Shuen (1997), March (1991), Grant (1996), Prahalad & Hamel (1990), Williamson (1979), Wernerfelt (1984), Teece (2007).

Contemporary AI Canon includes: Hutzschenreuter et al. (2025), Jarrahi (2018), Shrestha et al. (2019), Kellogg et al. (2020), Makarius et al. (2020), von Krogh (2018), and others.

Cases

Harvard Business School cases are used on alternating weeks. Cases include:

- *AI Wars* (Week 2)
- *HubSpot and Motion AI* (Week 4)
- *Osaro: Picking the Best Path* (Week 6)
- *JPMorganChase: Leadership in the Age of GenAI* (Week 8)
- Executive Board Simulation (Week 10)

Software

Students will use AI tools (e.g., Claude, ChatGPT, or equivalent) as part of the AI Strategy Laboratory component. No programming experience is required.

Technology Requirements

- Reliable internet connection
- Access to the course Learning Management System (LMS)
- AI tools as assigned per laboratory exercises
- Computer meeting standard university requirements

Course Schedule

For complete weekly module details, see [Part V — Course Roadmap and Weekly Learning Modules](#).

Week	Topic	CPC Topic(s)	Est. CPC Hours	Readings	Assignments Due
1	What Is Strategy in the Age of AI?	Business Policies (Strategic Mgmt)	2	Porter (1996); Hutzschenreuter et al. (2025)	Select client organization
2	Competitive Advantage and AI	Business Policies; Global Dimensions	2	Barney (1991); Biloslavo et al. (2024)	Industry & competitive analysis
3	Dynamic Capabilities	Management	2	Teece, Pisano & Shuen (1997); AI & Capabilities reading	Organizational capability assessment
4	Organizational Learning	Management; Information Systems	2	March (1991); Jarrahi (2018)	AI opportunity assessment
5	Knowledge as a Strategic Resource	Management; Information Systems	2	Grant (1996); Shrestha et al. (2019)	Knowledge, data & AI asset evaluation
6	Core Competencies	Management; Business Policies	2	Prahalad & Hamel (1990); Dellermann et al. (2019)	Strategic alternatives & recommendation
7	Organizational Boundaries	Management; Legal Environment	2	Williamson (1979); Kellogg et al. (2020)	Governance & risk assessment
8	AI Ecosystems and Platforms	Information Systems; Global Dimensions	2	Wernerfelt (1984); Rai et al. (MIS Quarterly)	AI transformation roadmap
9	Strategic Leadership	Management; Business Policies	2	Teece (2007); von Krogh (2018)	Final consulting report preparation

Week	Topic	CPC Topic(s)	Est. CPC Hours	Readings	Assignments Due
10	Toward a Theory of AI Strategy	Business Policies; Comprehensive Experience	2	Course synthesis; Makarius et al. (2020)	Final presentation & consulting engagement

Assessment Methods

- Class Participation and Executive Discussion
- Weekly Theory Evolution Exercises
- Harvard Business School Case Analyses
- AI Strategy Laboratories
- Semester AI Strategy Consulting Project
- Executive Board Presentation
- Professionalism and Reflection Portfolio

Grading Policy

Assessment	Weight
Class Participation and Executive Discussion	10%
Weekly Theory Evolution Exercises	15%
Harvard Business School Case Analyses	15%
AI Strategy Laboratories	20%
Semester AI Strategy Consulting Project	25%
Executive Board Presentation	10%
Professionalism and Reflection Portfolio	5%
Total	100%

For complete rubrics and grading standards, see [Part VIII — Assessment, Rubrics, and Professional Standards](#).

Course Learning Outcome Assessment Matrix

Assignment	CLO 1	CLO 2	CLO 3	CLO 4	CLO 5	CLO 6	CLO 7	CLO 8	CLO 9	CLO 10
Class Participation	X			X			X			
Theory Evolution Exercises			X		X				X	

Assignment	CLO 1	CLO 2	CLO 3	CLO 4	CLO 5	CLO 6	CLO 7	CLO 8	CLO 9	CLO 10
HBS Case Analyses	X		X		X					
AI Strategy Laboratories		X	X			X		X		
AI Strategy Consulting Project	X	X	X	X	X	X	X	X	X	X
Executive Board Presentation				X			X	X		X
Professionalism & Reflection Portfolio				X		X				X

Assignment Descriptions

For complete assignment descriptions, see [Part VII — The AI Strategy Consulting Project](#) and [Part VI — AI Strategy Laboratories](#).

Theory Evolution Exercises — Ten short weekly essays responding to the prompt: "If I were rewriting this classical theory in 2026, I would..." Students identify underlying assumptions of classical theories, evaluate how AI challenges those assumptions, and propose theoretically grounded revisions.

HBS Case Analyses — Four Harvard Business School case analyses submitted on alternating weeks (Weeks 2, 4, 6, 8). Each analysis applies strategic management frameworks to real organizational AI challenges.

AI Strategy Laboratories — Hands-on laboratory exercises using AI tools to perform strategic analysis tasks. Labs are completed approximately every other week and develop responsible, critical AI use as a professional competency. See [Part VI](#).

AI Strategy Consulting Project — Semester-long team consulting engagement advising an existing organization on AI strategy. Weekly milestones build toward a final consulting report and executive presentation. See [Part VII](#).

Executive Board Presentation — Teams present their final AI strategy recommendations in a simulated Board of Directors meeting during Week 10. Evaluated on strategic rigor, evidence quality, and executive communication.

Attendance and Participation Policy

This course is discussion-intensive. Active, prepared participation is essential to the learning environment. Students are expected to attend every class session having completed all assigned readings.

Participation is evaluated on the quality of contributions to executive discussions, case debriefs, and laboratory sessions — not merely on frequency of speaking. Unexcused absences will reduce the participation grade. More than two unexcused absences may result in a grade penalty; please contact the instructor in advance if conflicts are anticipated.

See [Part IX — Responsible AI, Academic Integrity, and Professional Conduct](#) for full professional conduct expectations.

Communication Expectations

Students may reach the instructor by email. Responses are typically provided within 48 hours on business days. Course announcements will be posted to the Learning Management System.

Students are encouraged to visit office hours for substantive discussions about course content, consulting project milestones, or career questions related to strategic management and AI.

Artificial Intelligence (AI) Policy

This course views artificial intelligence as a thinking partner, not an answer generator. Students are encouraged to use AI tools to brainstorm, compare theories, summarize literature, draft outlines, and support strategic analysis.

All submitted work must reflect the student's own reasoning, judgment, and scholarly understanding. AI-generated content submitted without meaningful intellectual contribution constitutes a violation of academic integrity. Major assignments must include a brief AI Disclosure Statement describing how AI was used in the preparation of the work.

For the complete AI policy including appropriate and inappropriate uses, see [Part IX — Responsible AI, Academic Integrity, and Professional Conduct](#).

Academic Integrity

All work submitted in this course must be the student's own original work. Fabricating citations, submitting AI-generated content as independent scholarship, misrepresenting sources, or presenting others' work as one's own constitutes academic dishonesty and will be addressed according to university policy.

See [Part IX](#) for full academic integrity expectations.

Accessibility and Accommodations

Students requiring accommodations due to a disability should contact the appropriate university disability services office and provide documentation as early as possible. The instructor is committed to ensuring equitable access to all course materials and activities. Please reach out to discuss accommodations at the start of the term.

Course Policies

- Late assignments are subject to a 10% per-day penalty unless an extension is arranged in advance.
- All written work should follow APA 7th edition citation format.
- Professional conduct is expected during all class sessions and consulting presentations.
- Students are responsible for any content or announcements posted to the LMS.

For complete policies on professional standards, confidentiality, and responsible AI use, see [Part IX — Responsible AI, Academic Integrity, and Professional Conduct](#).

Important Dates

Date	Activity
Week 1	Client organization selected; strategic challenge defined
Week 2	Industry and competitive analysis due
Week 4	AI opportunity assessment due
Week 6	Strategic alternatives and recommendation due
Week 8	AI transformation roadmap due
Week 9	Final consulting report draft due
Week 10	Executive Board Presentation and final consulting report

University Syllabus

Students are responsible for reviewing the university's standard syllabus policies, including those governing academic integrity, disability services, Title IX, student conduct, and grade appeals. These policies are incorporated by reference and available through the university registrar and student affairs office.

Full Course Documentation

This syllabus is supported by the following detailed course documents:

Document	Description
Part 0 — Course Philosophy	The intellectual rationale for this course
Part I — Course Foundations	Preface, philosophy, pedagogical model
Part II — Course Design	Objectives, CLOs, AoL, learning progression
Part III — Intellectual Foundations	Classical and AI scholarship overview
Part IV — The AISE Framework	The AI Strategy Evolution Framework
Part V — Weekly Learning Modules	Detailed week-by-week course roadmap
Part VI — AI Strategy Laboratories	Lab descriptions and instructions
Part VII — AI Strategy Consulting Project	Consulting project milestones and rubrics
Part VIII — Assessment Standards	Full rubrics and grading criteria
Part IX — Policies	AI policy, academic integrity, professional conduct
Part X — Reading List	Complete annotated bibliography
